CAPP Report Says Canada Needs More Major Oil Pipelines

Forecasted growth in Canadian oil production shows new major oil pipelines are urgently needed to deliver safe, secure and reliable energy to domestic and world markets. 2016 Crude Oil Forecast CAPP Report Cover According to the 2016 Crude Oil Forecast, Markets and Transportation report, released June 23 by the Canadian Association of Petroleum Producers (CAPP), more than 850,000 additional barrels per day (bpd) of oil sands supply will be available by 2021. However, the report shows that Canada doesn't have enough pipeline capacity to handle such output. [Read More](#)

TransCanada Completes Columbia Pipeline Group Acquisition

It's official. After three and a half months since it was announced, TransCanada Corp. has acquired all of the outstanding shares of Columbia Pipeline Group Inc. for an aggregate purchase price of approximately \$13 billion (USD), including the assumption of approximately \$2.8 billion of debt.
