TECHNOLOGY

Reflections on 25 Years of Microtunneling: A Q&A with GHD's Craig Camp

Now in his 25th year in the microtunneling industry, Craig Camp has seen the technology move from its infancy in the United States, to a mature market that is seemingly setting new heights every week. *Trenchless Technology* sat down with Camp to share his thoughts on the market – past, present, and future. Camp worked for Iseki from 1994 to 2000, and has been closely involved with microtunneling since, as a consultant at various firms, most currently, with GHD.

Submit Your Entry for the 2018 *Trenchless Technology* Project of the Year Awards

Trenchless Technology is accepting nominations for its 2018 Projects of the Year competition. Projects of the Year are awarded in two categories – New Installation and Rehabilitation – based on the following criteria: technical advancements; technical complexity; milestones and records; interaction and cooperation; and industry advancement. Projects should be completed between July 1, 2017, and June 30, 2018. Only North American projects are recognized. To be considered, follow this link to complete the entry form.

A monthly newsletter by *Trenchless Technology* focused on horizontal directional drilling in the underground construction market.

Tips When Shopping for Used HDD Tooling

New HDD tooling can get expensive. For this reason, many will search to find used tooling that will work for their drill rig and the bore they need to complete. When looking for used tooling there are several factors to consider. For drill head setups, reamers and hole openers a contractor needs to select the correct diameter, shaft, thread size and style for the specific ground conditions of their job. Finding the right used piece that ticks all these boxes can be challenging.
