John Deere Adds Complete Topcon Integration to New SmartGrade

Making its debut at World of Concrete 2016, the John Deere 700K SmartGrade operator offers complete integration of the Topcon GC-IMC Grade Control System. The system is fully integrated into the machine's cable, structure, and software – delivering precise grading performance while eliminating vulnerable external parts and cables. All of this combines for one of the smartest graders on the market. (and we're not just saying that because of the production hat that set atop the cabin on the show floor). [READ MORE](#)

WATCH: Concrete Imaging Done in Real Time with the MALA CX System

We were wondering around the show floor at World of Concrete 2016 in Las Vegas and just had to stop and see the MALA CX Concrete Imaging System in action. The MALA CX is an easy-to-use ground penetrating radar system designed for the non-destructive investigation and imaging of concrete and other structures. [Read More](#)

Viewpoint Construction Software releases Field View to capture reports, info from anywhere

Viewpoint Construction Software had its largest presence ever at World of Concrete in Las Vegas this year and debuted Field View, a cloud-based and mobile solution that allows contractors to capture field reports and information from anywhere – even without an internet connection – helping to resolve issues quickly, eliminate paper, reduce risk and deliver higher quality projects. [Read More](#)

WATCH: Digge's 40DS Auger Drive at World of Concrete 2016

At World of Concrete 2016, we stopped by the Digge booth to hear about its new 40DS Auger Drive. Digge is one of the largest manufacturers and suppliers of planetary gearboxes for machinery attachments. The company's North American manufacturing facility is based in Cleveland, Ohio, which provides a central location for test distribution and service. In addition to its state-of-the-art fabrication, assembly and powder coating capabilities. [Read More](#)
